## AZELAC RU

### Spotless beauty

ACTIVE INGREDIENTS THAT BLOCK ALL PHASES OF MELANIN SYNTHESIS

## Here it is, **an effective solution against blemishes**

Thanks to nanotechnology and its innovative active ingredients, **AZELAC RU** manages to act directly on the cells responsible for skin pigmentation, **melanocytes**, thus fighting the root cause of blemishes, not only their signs.

**In only 8 weeks you will notice a significant reduction of blemishes, helping reduce pigmentations by up to 38%.**

**The result is unified, radiant and spotless skin.**

### Triple depigmenting action

- ① **LIGHTENS:** Blocks and reduces melanin production effectively.
- ② **REDUCES:** Prevents melanin dispersion and eliminates any excess.
- ③ **PREVENTS:** Slows down the appearance of blemishes.

**Can be used all year long, even during the summer** !

## results

Its efficacy is demonstrated to address melasma, sun spots and blemishes caused by aging.

Users notice:

- **95% DEPIGMENTING EFFECT**
- **75% REDUCED SIZE OF BLEMISHES**
- **85% MORE EVEN SKIN TONE**
- **76% MORE RADIANT SKIN**

### DIRECTIONS

Apply morning and night on dry and clean skin with a gentle massage until the product is completely absorbed.

\*Study carried out on 20 women after 56 days of product application. In 28 days, blemishes start to disappear, and excess pigmentation is reduced by 26%.
